## For Employers

### **Enabling businesses to build highly skilled workforces.**

What the South West needs is the professional-skills development, and industry-focused training, to match the ambitions and operational requirements of our region's businesses; particularly the small and medium-sized enterprise (SME) sector – that is the lifeblood of our local economy. Rural regions throughout the country are experiencing an exodus of both qualified professionals, and talented young learners, and the key Science, Technology, Engineering, and Mathematics (STEM) sectors are facing a nationwide skills shortage. Add to this our excellent Health & Social Care and Education provisions - alongside our thriving Hair & Beauty and Hospitality & Catering sectors - and it's clear to see that we have the infrastructure for major economic growth in our region.
